CLASSIFY THE NATURE OF YOUR DISPUTE

Check which of the following district requirements your dispute concerns:

___ In accordance with the rights of parents enumerated in ss. 1002.20 and 1014.04, F.S., the school must adopt procedures for notifying a student's parent if there is a change in the student's services or monitoring related to the student's mental, emotional, or physical health or well-being and the school's ability to provide a safe and supportive learning environment for the student. The procedures must reinforce the fundamental right of parents to make decisions regarding the upbringing and control of their children by requiring school personnel to encourage a student to discuss issues relating to the student's well-being with his or her parent or to facilitate discussion of the issue with the parent. The procedures may not prohibit parents from accessing any of their student's educational and health records created, maintained, or used by the school, as required by s. 1001.22(2), F.S.

___ A school district may not adopt procedures or student support forms that prohibit school personnel from notifying a parent about his or her student's mental, emotional, or physical health or well-being, or a change in related services or monitoring, or that encourage or have the effect of encouraging a student to withhold from a parent such information. School personnel may not discourage or prohibit parental notification of and involvement in critical decisions affecting a student's mental, emotional, or physical health or well-being. This requirement does not prohibit a school from adopting procedures that permit school personnel to withhold information from a parent if a reasonably prudent person would believe that disclosure would result in abuse, abandonment, or neglect as defined in s. 39.01, F.S.

___ Classroom instruction by school personnel or third parties on sexual orientation or gender identity may not occur in kindergarten through grade 3 or in a manner that is not age appropriate or developmentally appropriate for students in accordance with state standards.

___ At the beginning of the school year, the school must notify parents of each healthcare service offered at their student's school and the option to withhold consent or decline any specific service. Parental consent to a health care service does not waive the parent's right to access his or her student's educational health records or to be notified about a change in his or her student's services or monitoring.

___ Before administering a well-being questionnaire or health screening form to a student in kindergarten through grade 3, the school must provide the questionnaire or health screening form to the parent and obtain the permission of the parent.
